

Free Your Team from Administrative Burden

The Digital Clinical Assistant (DCA) - Healthcare-Native Intelligent Automation

The Problem: Your Best People Are Drowning in Paperwork

The Administrative Crisis: Your clinical and administrative teams spend 40% of their day on repetitive tasks—chasing prior authorizations, processing referrals, and cleaning cluttered inboxes. This isn't just inefficient—it's a primary driver of **burnout, turnover, and poor patient experience**.

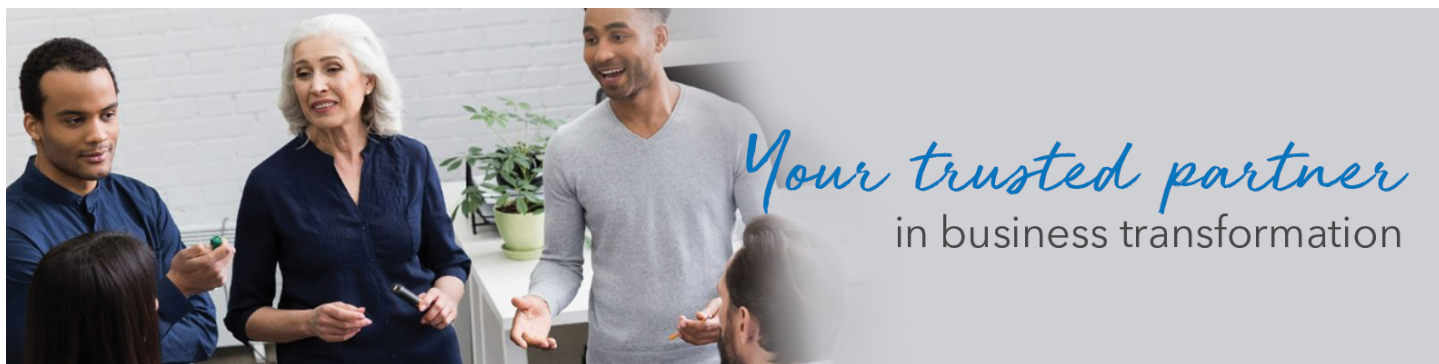

The Hidden Costs: Staff spending 50-60 hours weekly on low-value tasks, 6-week referral backlogs causing patient abandonment, 80% initial denial rates on prior authorizations, critical information buried in cluttered EMR inboxes, and manual errors in lab processing risking patient safety.

The Solution: Healthcare-Native Intelligent Automation

DCA is built specifically for healthcare workflows—understanding clinical terminology, regulatory requirements, and payer complexities. Unlike generic automation tools, DCA integrates seamlessly with your existing EMR (Athena, Epic, Cerner, and 15+ others) without disrupting current processes.

Human-in-the-Loop Design: DCA handles high-volume routine work while flagging complex cases that require clinical expertise. Your team maintains complete oversight while focusing on patient care.

Core Automation Solutions

Referral Automation

Prior Authorization

- 6-week backlogs, patient leakage

- Save 1+ FTE annually, eliminate backlogs

Automate 75% of intake process with same-day patient contact

- 20 hours/week per provider, delayed care

- Cut costs 60%, free up 300+ nurse hours

Intelligent PA lifecycle management within existing EMR

Inbox & Document Cleanup

- Critical info buried, staff burnout

- Save 50-60 staff hours weekly

Intelligent automation with priority flagging

Lab Processing

- Manual errors, 12+ min per result

- Free up 40 hours daily, eliminate errors

AI-powered extraction with intelligent routing

Why Healthcare Organizations Choose DCA

- ✓ Healthcare-native intelligence that understands medical workflows
- ✓ Human oversight maintained for clinical decision-making
- ✓ Same-day implementation with immediate time savings
- ✓ Works within existing EMR systems—no expensive replacements
- ✓ Proven results across 50+ healthcare organizations
- ✓ Comprehensive support and implementation guidance

Implementation and Support

Immediate Impact: Up to 50% reduction in administrative burden with same-day implementation and immediate time savings. Complete audit trails for regulatory compliance that scales seamlessly across single practices to health systems.

Comprehensive Approach: Unlike point solutions, DCA provides integrated automation across all major administrative workflows, creating compound efficiency gains and consistent user experience.

Proven Track Record: Successfully implemented across 50+ healthcare organizations from specialty practices to integrated delivery networks, with consistent results and high satisfaction rates.
